

PROJECT REPORT

Course Code: CSE0001

Course Title: Digital Literacy

Submitted By:

Name: Vaishnavi S Nair

Registration Number: 25BCE10498

Branch: B.Tech Computer Science and Engineering

Year: First Year

Date: 26/03/2026

Introduction

In today's digital age, having strong digital literacy skills is essential for academic success and professional growth. This project was undertaken as part of the Digital Literacy course to develop a better understanding of the tools, platforms, and practices required to navigate the digital world effectively and responsibly.

As a Student Digital Ambassador, the objective of this project was to explore various aspects of digital literacy, including creating a professional online presence, using collaborative tools, practising coding, understanding email etiquette, and spreading awareness about cybercrime. Each task in this project provided hands-on experience with real-world digital platforms such as GitHub, LinkedIn, and Google Forms.

Overall, this project helped in building practical skills, improving online communication, and understanding the importance of safe and responsible digital behavior.

WRITE-UPS

TASK 1

For this task, I created a digital literacy awareness infographic using Canva, a user-friendly online design tool. The aim of the infographic was to present key concepts of digital literacy in a simple and visually appealing manner for my peers.

The design covered important topics such as the definition of digital literacy, safe internet practices, and the importance of maintaining a professional online presence. I included points on using strong passwords, avoiding suspicious links, and being mindful of one's digital footprint. Additionally, I highlighted useful digital tools that students can use for learning and communication.

While creating the infographic, I found it interesting to explore different templates, icons, and layouts available in Canva, which made the design process creative and engaging. However, one challenge I faced was organizing the information in a clear and concise way without overcrowding the design.

Overall, this task helped me understand how to effectively communicate important information through visual content, which is an essential skill in today's digital world.

TASK 2

For this task, I created and updated my profiles on **GitHub, LinkedIn, and Kaggle** to build a strong digital presence. GitHub is mainly used for showcasing coding projects and maintaining repositories, which helps in demonstrating practical skills. LinkedIn serves as a professional networking platform where I added my education details, enabling connections with peers, seniors, and industry professionals. Kaggle is a platform for data science and machine learning practice, where users can work on datasets and improve analytical skills.

Over the next four years, I plan to actively use GitHub to upload my academic projects, personal coding work, and collaborative contributions. On LinkedIn, I aim to build a professional network, share achievements, and explore internship opportunities. Kaggle will help me strengthen my problem-solving and data analysis skills through regular practice and participation in competitions.

Overall, creating these profiles has helped me understand the importance of maintaining a professional online identity, which will be valuable for internships and future career opportunities.

TASK 3

For this task, I used **HackerRank** as a coding practice platform and **Google Forms** as a collaboration tool.

On **HackerRank**, I completed a beginner-level programming challenge, which helped me understand basic concepts such as input, output, and logical problem-solving using Python. Practising on such platforms is essential for improving coding skills and building a strong foundation for future technical learning.

In addition, I created a "Digital Literacy Awareness Quiz" using Google Forms. The form included five questions, combining multiple-choice and short-answer formats to assess basic understanding of digital literacy and safe internet practices. I also explored the response section, which is linked to Google Sheets, to see how data is collected and organized.

These tools will be highly beneficial for my academic growth. HackerRank will help me continuously practise coding and prepare for assessments and technical interviews, while Google Forms can be used for creating surveys, quizzes, and collecting data for projects. Overall, this task enhanced my practical understanding of useful digital tools.

TASK 4

Poor digital communication can often lead to misunderstandings and serious consequences. For example, if a student sends an email to a professor without a proper subject line, greeting, or clear message, it may be ignored or misunderstood. Similarly, using informal language or unclear requests can create confusion and reflect unprofessional behavior.

Such situations can be avoided by following proper email etiquette, including writing a clear subject line, using a respectful tone, and structuring the message properly. It is also important to proofread emails before sending them to ensure clarity and correctness.

This task helped me understand the importance of effective digital communication. By applying these principles, I can communicate more professionally with faculty members and organizations, which is essential for academic and career growth.

TASK 5

While researching cybercrime, I was surprised by how realistic phishing attacks can appear and how easily individuals can be misled into sharing sensitive information. The fact that attackers can replicate official websites and messages so accurately makes these scams difficult to identify.

This task made me more aware of the importance of verifying sources before taking any action online. One habit I will change is being more cautious while clicking on links in emails or messages, even if they appear to be from trusted sources.

Overall, this task helped me understand the seriousness of cyber threats and the need for responsible digital behavior. It also highlighted the importance of spreading awareness among students to prevent such incidents.
