

TASK 2 - DIGITAL PORTFOLIO

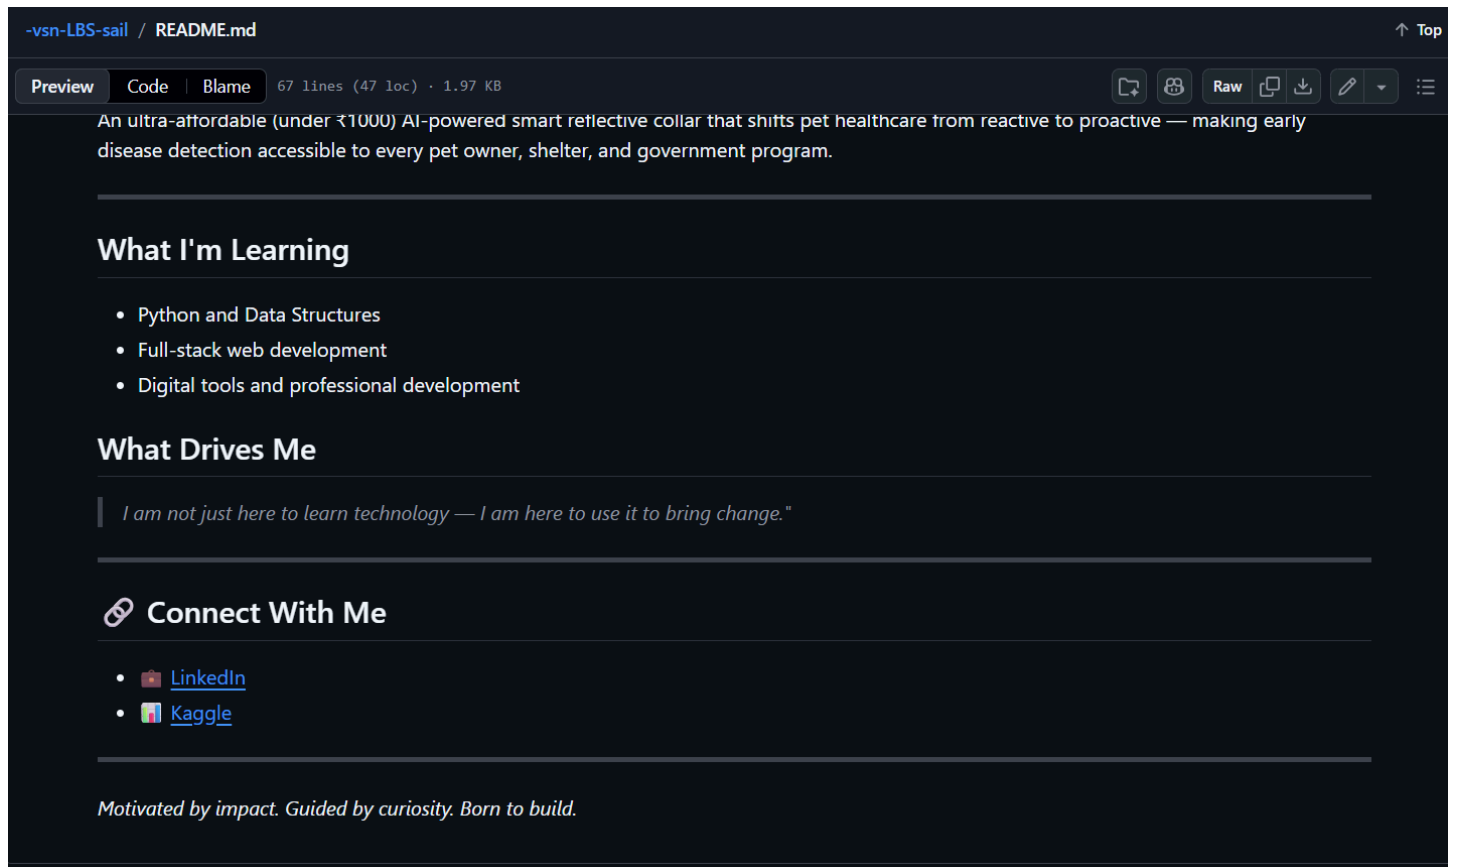

1. GitHub: (Profile link - github.com/vsn-LBS-sail)

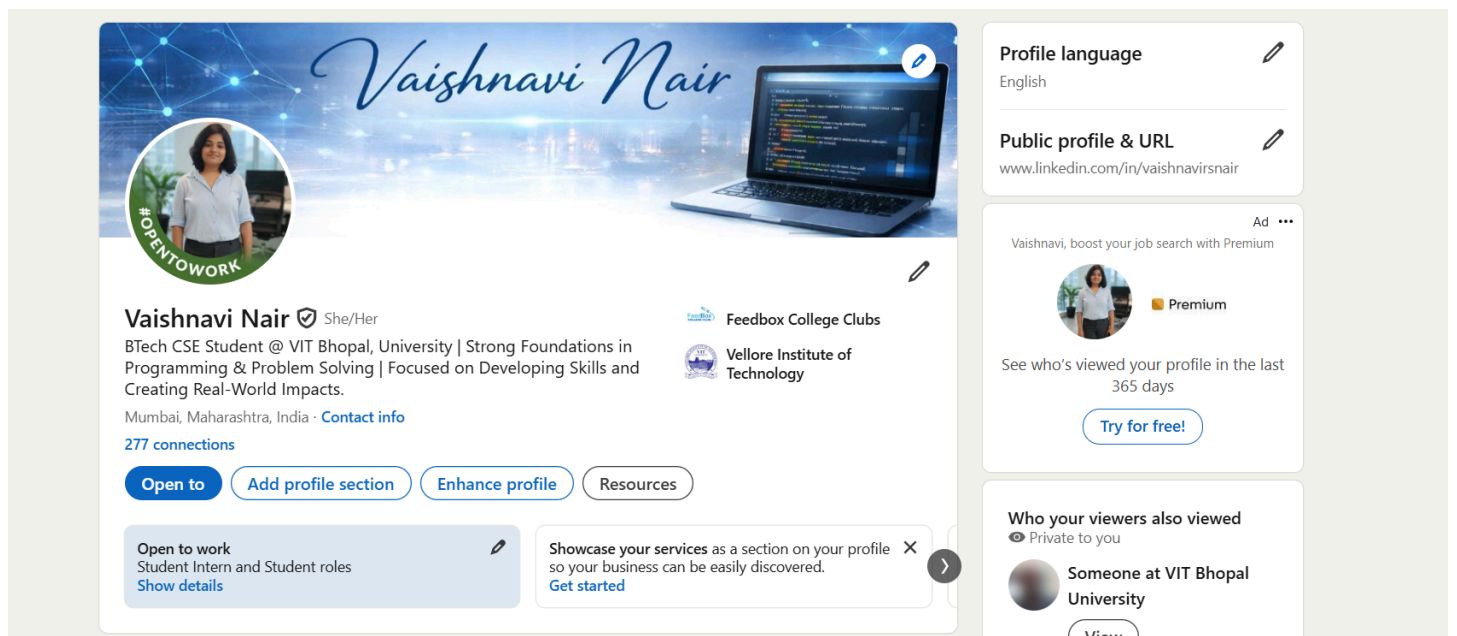

The screenshot shows a GitHub profile page for the user 'vsn-LBS-sail'. The page has a dark theme. At the top, there's a header with the username and a 'My Profile' link. Below this, there's a navigation bar with 'Preview', 'Code', and 'Blame' tabs. The main content area displays the profile name 'vsn-LBS-sail' and a bio: 'I'm Vaishnavi S Nair', followed by 'First Year B.Tech Computer Science and Engineering Student | VIT Bhopal University | Expected Graduation Year: 2029'. Below the bio, there's a section titled 'About Me' with three paragraphs of text. The first paragraph states: 'I am a first-year CSE student at VIT Bhopal University, driven by a simple but powerful belief — that technology should create real, meaningful change in the world around us.' The second paragraph states: 'Whether it is building smarter systems, solving everyday problems with code, or using AI to make life easier for people who need it most, I want my work to matter beyond the screen.' The third paragraph states: 'I am currently exploring AI/ML, data science, and software development — and I am just getting started.'

The screenshot shows a GitHub README file for the user 'vsn-LBS-sail'. The page has a dark theme. At the top, there's a header with the username and a 'README.md' link. Below this, there's a navigation bar with 'Preview', 'Code', and 'Blame' tabs. The main content area displays the title 'Projects' with a link icon. Below this, there's a section titled 'Saukhyam — Empowering Women's Health Awareness' with a subtitle 'Built at Ideathon & Innovit Hackathons | Team Leader & Backend Developer'. The text describes a digital platform designed to promote menstrual health awareness, break stigma, and connect users with sustainable menstrual solutions — especially in rural and semi-urban areas. It lists the tech stack: HTML, CSS, JavaScript, Python (Flask), SQLite3, and the features: Health tracker, doctor connect, AI insights, community stories, mental health resources. The mission is to make menstrual health education stigma-free, accessible, and tech-enabled. Below this, there's a section titled 'Pawsitive Diagnostics — AI-Powered Smart Pet Collar' with a subtitle 'Team Member | Upcoming Project'. The text describes an ultra-affordable (under ₹1000) AI-powered smart reflective collar that shifts pet healthcare from reactive to proactive — making early disease detection accessible to every pet owner, shelter, and government program.

2. LinkedIn (Profile link - www.linkedin.com/in/vaishnavirsnair)

About

A dedicated and enthusiastic BTech CSE student with strong foundations in programming, problem solving, and core computer science principles. I actively participate in hackathons to gain structured exposure, build project-based experience, and collaborate effectively in team environments. These engagements strengthen my ability to work under deadlines, translate ideas into workable solutions, and approach challenges with a practical mindset.

I'm genuinely curious about how technology connects with real-world challenges and how better systems can improve people's lives. I am focused on developing industry-ready skills, deepening my technical capabilities, and eager to take on opportunities that help me learn, build, and create impact.
